Profile

Passionate about crafting responsive and user-friendly websites. A fast learner with a strong foundation in problem-solving and a keen eye for design. I am excited to contribute to innovative web projects and expand my skills in a collaborative team environment.

Education

2013-2017	Bachelor of Engineering (Electronic & communication), SJITM Khargone
2012-2013	Intermediate, GGHSS Khargone (MP)
2010-2011	Matriculation, GHSS Khargone (MP)

Experience

Jul 2018 – Dec 2018	Business Development Executive at Parulsoft Web solution Indore Developed and implemented strategic business plans and marketing strategies. Gathering client needs, proposal writing, successfully identified emerging trends and leading innovation leading to successful business developments on our end.
Dec 2018 – Jan 2020	Business Development Executive at Technorizen Software Solution Indore As part of my previous role, I had several responsibilities, including developing and implementing plans and marketing strategies. This involved gathering client needs, writing proposals, successfully identifying emerging trends, and leading innovation that led to successful business outcomes. Additionally, I was responsible for developing and executing effective business development strategies to generate leads, close many successful deals, and win new business. I successfully completed weekly and monthly targets to ensure that we stayed on track to meet our goals.

Projects Description

- Coded websites using HTML, CSS, JavaScript, and Bootstraps.
- Developed user-friendly web forms with validation and error handling.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript coding.
- Determined coding requirements for specialized scripts.
- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3.
